

## Barastoc Breed N Grow

### Ultimate full-feed pellet for broodmares, breeding stallions, weanlings and yearlings

During the last third of pregnancy, the mare must cater to a very rapidly growing foetus. The birth weight and strength of the new born foal is largely determined by the quality of the mares' nutrition at this critical stage.

Once born, the foal must receive the best quality nutrition from the mare's milk in order to sustain its growth and remain strong. And that's not forgetting the mare. She needs to maintain peak nutrition in order to produce her milk and remain in condition to support another pregnancy, which is often during the foal heat.

Barastoc Breed N Grow is the "cornerstone" feed for horse breeders. A highly palatable pellet formula, it is ideal for paddock feeding and has the advantage of no powders or waste. It contains high quality protein from soyabean meal plus added amino acids to support growth rates in young horses. There are also enhanced levels of macro and trace minerals to support bone growth and development and added silicon for improved bone density.

Barastoc Breed N Grow is also an ideal conditioning feed for stallions prior to and during the breeding season.

### Key Features:

1. Highly palatable pellet formula. NO powders or waste. Ideal for paddock feeding.
2. Contains high quality protein from soyabean meal.
3. Added amino acids to support growth rates in young horses.
4. Enhanced level of macro and trace minerals to support bone growth and development.
5. Added silicon for improved bone density.
6. Ideal conditioning feed for stallions prior to and during the breeding season.

### Feeding Directions:

BARASTOC BREED N GROW		
Horse Weight(kilograms)	Growth Stage	Feeding Rate(kilograms/day)
100 to 200	Creep fed foals 2 to 5 months of age	1.0 to 2.0
200 to 300	Weanlings 5 to 12 months of age	2.0 to 3.0
300 to 400	Yearlings 12 to 18 months of age	3.0 to 4.0
500	Pregnant mares last 3 months	5.0 to 6.0
500	Lactating mare first 3 months	5.0 to 6.0
500	Breeding Stallion	2.0 to 5.0

The following recommendations are intended as a guide only. The amount fed will vary according to the horses condition and the quality of pasture and/or roughage available. Barastoc Breed N Grow should be used to supplement grazing and/or

high quality roughage to not more than one half of the horses daily feed intake by weight. Introduce this product gradually over a 2 week period. Intakes less than the levels listed may require additional vitamin and mineral supplementation. Do not feed more than 2.5 kgs of this product per meal.

### **Other products in this range:**

If a more concentrated feed is required (less than 2kgs per day) consider Barastoc Legend (muesli feed).

### **Ingredients selected from the following:**

Cereal grains, bran, pollard, vegetable protein meals, legumes, vegetable oil, legume hulls, molasses, calcium carbonate, monocalcium phosphate, magnesium oxide, salt, bentonite, zeolite, vitamin and trace mineral premix.

Feed displayed on this package is indicative only. Appearance of feed may vary as a result of natural variation in the raw materials that are used, but does not affect the nutrient value of the feed

Crude Protein (minimum)...17%  
Crude Fat (minimum)..4%  
Crude Fibre (maximum)..15%  
Salt (minimum added)..1.0%  
Salt (maximum added)...1.25%  
Copper (added)...40mg/kg  
Selenium (added)..0.5mg/kg  
Calcium (minimum)...1.2%  
Calcium (maximum)...1.3%  
Phosphorus (minimum)...0.7%  
Lysine (minimum) ...0.75%  
Magnesium (minimum)...0.3%  
Potassium (minimum)...0.8%  
Digestible Energy (estimated)..12.5MJ/kg  
Vitamin A (added)..10500IU/kg  
Vitamin D (added)...1050IU/kg  
Vitamin E (added)..100mg/kg  
Thiamin (Vit B1) (added)..6.5mg/kg  
Riboflavin (VitB2) (added)...11mg/kg  
Pyridoxine (VitB6) (added)...3.25mg/kg  
Vitamin K3 (added)...5.5mg/kg  
Vitamin B12 (added)...0.035mg/kg  
Biotin (added)...0.125mg/kg  
Folic Acid (added)..3.25mg/kg  
Niacin (added)..33mg/kg  
Calcium Pantothenate (added)...13.25mg/kg  
Cobalt (added)...0.25mg/kg  
Manganese (added)...75mg/kg  
Ferrous Iron (added)...75mg/kg  
Iodine (added)...1.25mg/kg  
Zinc (added)...100mg/kg

The trace mineral and vitamin analysis listed above are only those amounts added. Total feed values may be higher. Full analysis available on request.

**WARNING:** This feed has been formulated specifically for animals as described on the package, or the label attached to the package, and must not be used for other species of animals. Unsuitable for human consumption. The manufacturer accepts no responsibility if this feed is used in quantities, conditions or in any way other than in accordance with the manufacturers recommendations. The manufacturers recommendations for the use of this product may be obtained by contacting our Customer Service Centre or the Head Office of the company.

This product does not contain restricted animal material

NET WEIGHT: 20 KG

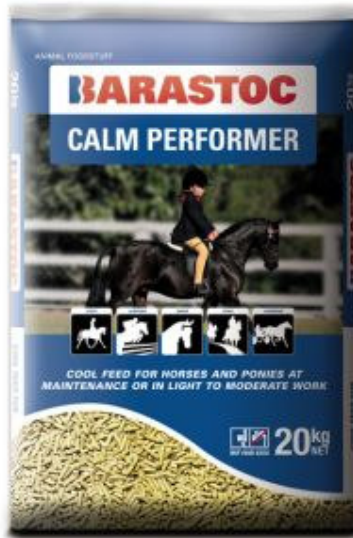

STORAGE REQUIREMENTS: Product should be stored in a cool, dry place protected from Sunlight and below 30°C

Best before 6 months from date of manufacture

Bag Dimensions: 790x380x100

## Barastoc Calm Performer

**BARASTOC**

### **Cool feed for horses and ponies at maintenance or in light to moderate work**

Don't risk having a horse or pony that is too 'hot' for its rider. While education plays an important role in developing tractable behaviour, feed can have a significant impact as well.

As many owners know, some horses get 'hot' at the very thought of food. Barastoc Calm Performer Pellets are formulated to provide the ideal source of balanced nutrition for potentially 'hot' horses and ponies in light to moderate work. Being free of oats, the corresponding low level of starch provides cooler energy, reducing the risk of tension and mental instability often associated with high grain diets.

Barastoc Calm Performer contains 11% protein, a level that suits a mature working horse or pony. Dolomite is also included to provide extra magnesium.

The pelleted formula ensures that every mouthful provides balanced nutrition and stops horses from sifting out important ingredients. It also contains molasses to keep them eating right to the bottom of the bin.

## Key Features:

1. Pelleted formula - Every mouthful is balanced nutrition. Stops sifting out of important ingredients
2. Low level of starch for cooler energy.
3. Contains molasses to keep them eating to the bottom of the bin.

## Feeding Directions:

<b>BARASTOC CALM PERFORMER</b>		
<b>Feeding Rate (kilograms/day)</b>		
<b>Horse Weight(kilograms)</b>	<b>Maintenance &amp; Light Work</b>	<b>Moderate Work</b>
300	1.0 to 2.5	1.5 to 3.0
400	1.5 to 3.0	2.0 to 4.0
500	1.5 to 3.5	2.5 to 4.5
600	2.0 to 4.0	3.0 to 5.0

The following recommendations are intended as a guide only. The amount fed will vary according to the horses condition and the quality of pasture and/or roughatge available. Barastoc Calm Performer should be used to supplement grazing and/or high quality roughage to not more than one half of the horses daily feed intake by weight. Introduce this product gradually over a 2 week period. Intakes less than the levels listed may require additional vitamin and mineral supplementation. Do not feed more than 2.5 kgs in a meal.

## Other products in this range:

For a higher energy pellet alternative, consider Barastoc Sovereign.

## Ingredients selected from the following:

Cereal grains, bran, pollard, vegetable protein meals, legumes, legume hulls, molasses, calcium carbonate, monocalcium phosphate, magnesium oxide, dolomite, salt, bentonite, vitamin and trace mineral premix.

Feed displayed on this package is indicative only. Appearance of feed may vary as a result of natural variation in the raw materials that are used, but does not affect the nutrient value of the feed
